Sprint 2

Task 427: Figure out if there is an SDK in order to use cognito for login

Yes, there is a front-end that can be stood up using cognito. It is a front-end log in page that takes care of user logins, creating new user accounts, and changing passwords without having to code anything. It can all be done through using the cognito AWS console.

Task 428: Determining how to utilize front end with the front end we are using

Good documents on how to stand up cognito in order to stand up the front end.

<https://docs.aws.amazon.com/cognito/latest/developerguide/cognito-user-pools-app-integration.html#cognito-user-pools-app-integration-view-hosted-ui>

Walks through how to make user pools, make the hosted UI, and ultimately stand up the hosted UI resource

Task 434: Stand up a dummy resource using cognito to figure out the login front end

The screenshot shows the Amazon Cognito console interface. The browser address bar indicates the URL: `us-east-1.console.aws.amazon.com/cognito/v2/idp/user-pools/us-east-1_rF1IERmuh/app-integration?region=us-east-1`. The console page title is "Team-25-Practice_User-Pool".

User pool overview

Property	Value
User pool name	Team-25-Practice_User-Pool
User pool ID	us-east-1_rF1IERmuh
ARN	arn:aws:cognito-idp:us-east-1:274815321855:userpool/us-east-1_rF1IERmuh
Created time	February 8, 2024 at 16:00 EST
Last updated time	February 8, 2024 at 16:00 EST
Estimated number of users	1

Getting started

Users | Groups | Sign-in experience | Sign-up experience | Messaging | **App integration** | User pool properties

Configuration for all app clients

Domain and resource server settings for the user pool. All app clients that enable the Hosted UI use the user pool domain. All app clients can authorize access to user pool resource servers.

Domain Info

Configure a domain for your Hosted UI and OAuth 2.0 endpoints. You must choose a domain if you need Cognito to create Hosted UI authentication endpoints. If you have an existing domain, you must delete it before assigning a new one.

Property	Value
Cognito domain	Domain
Domain	https://team25.auth.us-east-1.amazoncognito.com
Custom domain	Domain
Domain	-
